College of Management and Multidisciplinary Studies

PHYSICAL ACTIVITY

a cornerstone of a **healthy lifestyle.**

“**any bodily movement** produced by skeletal muscles that requires **energy expenditure**” (WHO, 2020)

*…being **physically active** does not necessarily require a **formal exercise program.***

IMPORTANCE OF PHYSICAL ACTIVITY

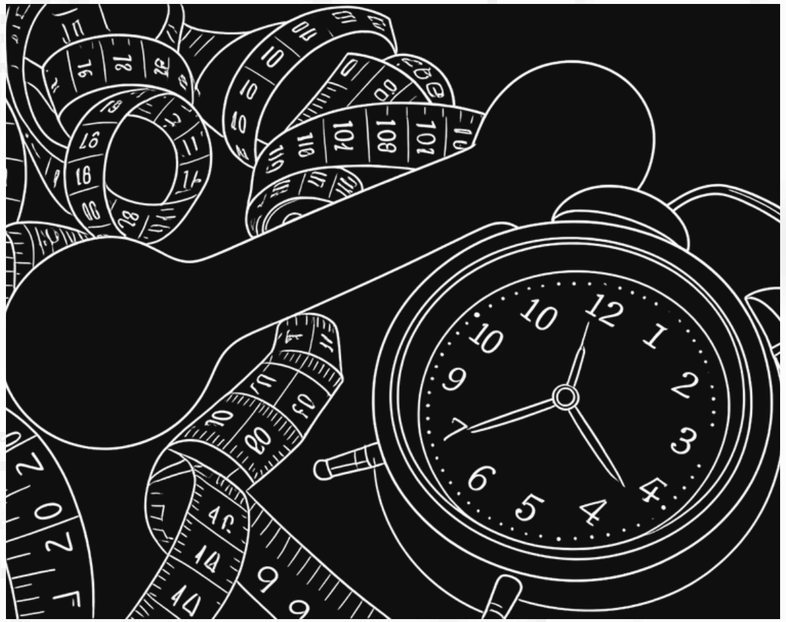

supported by scientific evidence demonstrating its impact on both physical and mental well-being

DISEASE PREVENTION 01

powerful preventative measure against a host of non-communicable diseases (NCDs)

ENHANCES QUALITY OF LIFE 02

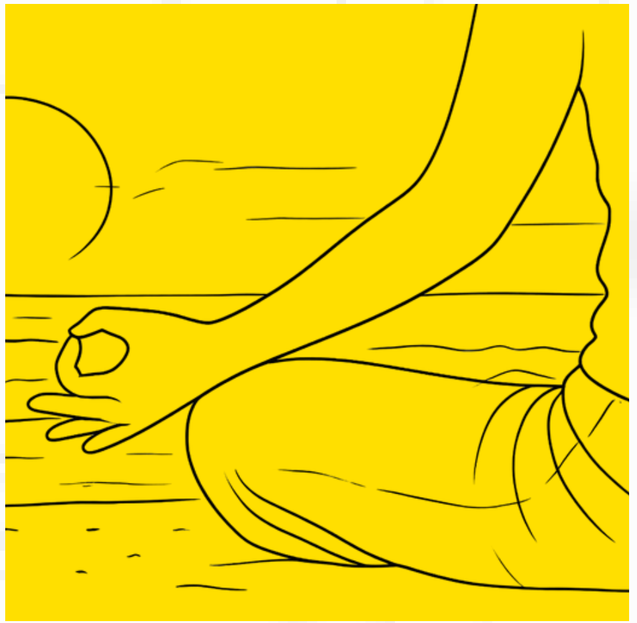

improve brain health, leading to better cognitive function, reduced feelings of anxiety, and a lower risk of depression

PHYSICAL ACTIVITY & DIMENSIONS OF WELLNESS

a state of **complete** physical, mental, and social **well-being**.

DIMENSIONS OF WELLNESS

01

PHYSICAL WELLNESS

Ability to maintain a healthy quality of life and perform daily activities without undue fatigue.

02

EMOTIONAL WELLNESS

Ability to manage stress, adapt to change, and maintain a positive outlook.

03

INTELLECTUAL WELLNESS

Ability to engage in lifelong learning, critical thinking, and creativity.

04

SOCIAL WELLNESS

Ability to build and maintain positive, supportive relationships.

WHO GUIDELINES & PHILIPPINE PHYSICAL ACTIVITY RECOMMENDATIONS

WHO Guidelines on Physical Activity and Sedentary Behaviour, 2020

- a comprehensive framework for all age groups, reaffirming the principle that ***some physical activity is better than none.***
- provide recommendations for **specific populations**, including pregnant and postpartum women and people living with chronic conditions or disabilities.

WHO Guidelines on Physical Activity and Sedentary Behaviour, 2020

For adults (18-64 years), the WHO recommends undertaking:

- ***150–300 minutes of moderate-intensity aerobic physical activity per week***
- ***OR 75–150 minutes of vigorous-intensity aerobic physical activity per week***
- **An equivalent combination of both**, for those who prefer variety.
- Adults are advised to perform **muscle-strengthening activities** involving all major muscle groups on two or more days a week.

LIMITING SEDENTARY BEHAVIOR = **BREAK LONG HOURS OF SITTING**

Philippine National Guidelines on Physical Activity (PNGPA), 2010

developed by local experts and the Department of Health (DOH), prescribing specific recommendations for different age brackets, tailored to the Philippine context, considering cultural activities, lifestyle patterns, and the national health landscape.

- It provides examples of **activities familiar to Filipinos**, such as **active travel, active daily tasks,** and **traditional games**, which are both enjoyable and physically engaging.
- **Dancing** is also strongly promoted, with Filipino cultural dances like tinikling and modern Zumba classes serving as fun aerobic workouts.
- For Filipino adults (21–45 years old), the PNGPA recommends **30–60 minutes of daily physical activity.**

SHORT TWO-MINUTE PHYSICAL ACTIVITIES FOR EVERY HOUR OF SITTING
